-

WORK EXPERIENCE

Backend Engineer • DigitNet

Dec. 2024 - Present

- Developed and maintained 20+ RabbitMQ consumers and producers for system integration.
- Created detailed SOPs and implemented a workflow to automatically refetch incomplete transaction data, reducing manual investigation time by 50%.

Backend Engineer • TitanSoft

Jul. 2022 - Nov. 2024

- Designed and implemented 50+ RESTful and gRPC APIs in .NET Core, handling 1M+ daily requests with 90% uptime.
- Implemented integration tests to improve test coverage by 30%, leveraging SpecFlow for enhanced test readability and maintainability.
- Developed and maintained 10+ Vue.js frontend pages.
- Implemented over 10 CI/CD automation scripts in YAML for Kubernetes.
- Designed a monitoring solution to ensure correct banner placements and provide immediate issue alerts via Slack, reducing manual checks and response time.

Backend Engineer • Wiser Tech

Jul. 2020 - Jun. 2022

- Developed and maintained 10+ RESTful APIs using C#, AngularJS, and JavaScript, enabling customized user functionality and improving integration efficiency.
 - Introduced Git as the team's version control system, improving collaboration and reducing integration conflicts by 80%.
 - Maintained and refactored multi-language ERP systems, improving system stability and maintainability.
 - Provided optimized T-SQL queries to support users in tracking and auditing critical data, reducing query time by 90%.
-

EDUCATION

National Chiao Tung University, Taiwan

Computer Science

attended, earning 100 hours toward a Bachelors Degree

SooChow University, Taiwan

Bachelor of Science in Physics, GPA: 4.7/5

Graduated: 2020
